

MUHAMMAD HAMZA

SQA Engineer · Experimentation & A/B Testing QA · Manual, Functional & Cross-Browser Testing

Karachi, Pakistan | hamzadanish031@gmail.com | +92 312 2985425

[LinkedIn](#) | [GitHub](#) | [Portfolio](#) | ISTQB CTFL v4 Certified

PROFESSIONAL SUMMARY

SQA Engineer with 4+ years of experience in manual, functional, and cross-browser/device testing across web-based products. Specializes in quality assurance for A/B testing and conversion-rate-optimization (CRO) experiments, serving as the final pre-launch checkpoint for variants deployed to the live websites of major NASDAQ- and NYSE-listed technology companies. Owns QA end-to-end across the delivery lifecycle — requirement understanding, test planning, execution, defect management, regression, and release validation — and communicates quality status directly with developers, product stakeholders, and clients. Validates front-end implementations pixel-perfect against Figma and works fluently across the leading experimentation platforms. ISTQB Certified Tester (CTFL v4), progressing toward senior QA ownership of strategy, process, and automation.

CORE COMPETENCIES

Testing: Manual · Functional · Regression · Smoke · Usability · Exploratory · API Testing · Cross-Browser/Device · Responsive Validation

A/B & Experimentation: VWO · Optimizely · Adobe Target · Intellimize · Varify · Amplitude · Mutiny · ContentSquare · HubSpot · Webflow Optimize

Tools: Jira · Azure DevOps · Asana · Postman · Chrome DevTools · Figma (design validation) · SQL

Process & Documentation: Agile/Scrum · SDLC & STLC · Defect Management · Release Validation · Test Plans · Test Cases · Bug Reports · QA Checklists

Strengths: End-to-end QA ownership · Pixel-perfect design validation · Stakeholder communication · QA process improvement

SELECTED CLIENT & PRODUCT QA

Pre-launch quality ownership for web experiments running on the live properties of publicly-traded technology companies. Specific experiment results are confidential under agency NDA.

- **Upwork** — Pre-launch QA of sign-up funnel and landing-page experiments on a high-traffic freelancing marketplace; functional and pixel-perfect Figma validation across the full browser/device matrix.
- **BILL** — Variant validation for finance-audience conversion journeys; cross-browser/device defect detection ensuring precise, consistent presentation on revenue-critical pages.
- **SailPoint** — QA sign-off for enterprise B2B landing and conversion experiments; contributed usability and layout feedback beyond pure defect-finding.
- **Rapid7** — End-to-end QA of marketing and conversion experiments for a technical audience, including build validation and post-fix regression.
- **Tenable / Nessus** — Pre-launch validation of variants against spec and design across a broad device landscape, coordinating closely with developers on resolution.

PROFESSIONAL EXPERIENCE

Software Quality Assurance Engineer

May 2025 – Present

[Spiralyze](#) · [Remote](#)

- Serve as the pre-launch quality gate for A/B testing and CRO experiments deployed to the live sites of major NASDAQ/NYSE-listed technology companies, preventing defective variants from reaching real traffic.
- Validate front-end variant implementations pixel-perfect against Figma designs using Chrome DevTools, protecting design integrity on high-visibility, conversion-critical pages.
- Execute functional, regression, usability, and exploratory testing across a full browser and device matrix to ensure consistent behavior for every visitor segment.
- Log, track, and re-verify defects in Asana; maintain test plans, test cases, bug logs, and QA checklists; feed UX and usability feedback back into the design process.
- Work across leading experimentation platforms — VWO, Optimizely, Adobe Target, Intellimize, Varify, Amplitude, and others — adapting QA to each tool's workflow.

SQA Engineer & Junior Scrum Master

Mar 2023 – Mar 2025

[Digit Simplified Solutions](#) · [Remote](#)

- In a lean 5-person startup, owned both QA and delivery coordination — running end-to-end testing while facilitating Agile ceremonies for the team.
- Developed and executed test plans, cases, and scripts for web and mobile applications across functional, regression, and usability testing.
- Performed API testing with Postman and validated backend data integrity using SQL; conducted performance and security testing for stability and scalability.
- Managed defects end-to-end in Jira and Azure DevOps, collaborating directly with developers through to resolution; produced test reports, defect logs, and release summaries.
- Facilitated sprint planning, backlog grooming, daily stand-ups, and retrospectives as Junior Scrum Master.

Project Coordinator

Oct 2021 – Mar 2023

Digit Simplified Solutions · Remote

- Coordinated documentation and communication between stakeholders and development teams; maintained project-tracking systems for transparency and progress monitoring.
- Assisted in defining requirements, acceptance criteria, and test criteria in early project phases; provided QA support through manual testing and defect reporting.

CERTIFICATIONS

Testing & QA: ISTQB Certified Tester — Foundation Level (CTFL v4); Test Automation Foundations (LinkedIn)

Software Engineering (IEEE): Software Engineering Management, Software Maintenance & Professional Practice (CSDA); Software Engineering Process (CSDP)

Cloud: Azure Fundamentals (AZ-900, Microsoft); ACA Cloud Computing

Project Management (Google): Foundations of Project Management; Project Initiation; Project Planning

Data & SQL (DataCamp): Introduction to SQL; Intermediate SQL Server; Relational Databases; Joining Data; Functions for Manipulating Data

21 professional certifications in total — full verifiable collection: github.com/hamzadanish031/my-certificates

EDUCATION

B.Sc. Computer Science

2019 – 2023

University of Karachi (UBIT)
